

Ideation Phase Empathize & Discover

Date	03-10-2026
Team ID	SWTID-2026-8713
Project Name	Implement Client Script & UI Policy (Incident)
Maximum Marks	4 Marks

Empathy Map Canvas:

An empathy map is a simple, easy-to-digest visual that captures knowledge about a user's behaviours and attitudes.

It is a useful tool to help teams better understand their users. Creating an effective solution requires understanding the true problem and the person who is experiencing it. The exercise of creating the map helps participants consider things from the user's perspective along with his or her goals and challenges.

Empathy Map – Client Script & UI Policy (User: ServiceNow Administrator / Developer)

What does the user SEE? - Incident fields that may be left incomplete - Fields that remain editable when they should be protected - Unnecessary fields displayed for every condition - Inconsistent data-entry practices between Incident records		
What does the user SAY AND DO? - Creates or updates Incident records - Changes fields such as State, Category, Subcategory and Assignment Group - Expects fields to become mandatory, read-only or visible when conditions are met - Uses the Incident form without needing to submit it to trigger field behavior	PAIN - Missing required Incident information - Users can edit fields that should be protected - Too many irrelevant fields can make the form confusing - Manual validation increases the chance of inconsistent data	GAIN - Required information is captured consistently - Restricted fields become read-only when appropriate - Relevant fields are shown based on Incident conditions - Better user experience and more accurate Incident records
PAIN - Role-based ACLs are too coarse for record-level rules - Scripts are hard to test and debug - Fear of over-blocking or leaking data - Confusing ACL evaluation order	GAIN - Only authorized users see records with restricted field values - Compliance and audit confidence - Least-privilege access with clear, reusable logic - Fewer support tickets about access issues
