

Ideation Phase

Define the Problem Statements

Date	03-10-2026
Team ID	SWTID-2026-8713
Project Name	Implement Client Script & UI Policy (Incident)
Maximum Marks	2 Marks

Customer Problem Statement Template:

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love.

A well-articulated customer problem statement allows you and your team to find the ideal solution for the challenges your customers face. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

Problem Statement – Client Script & UI Policy:

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A ServiceNow administrator responsible for the Incident form	Configure Incident fields to become mandatory, read-only, or visible when defined conditions are met	Users may leave important fields incomplete or edit fields that should be protected	The Incident form does not automatically enforce the required field behavior for every condition	Concerned about inconsistent Incident data and unnecessary manual checking
PS-2	A ServiceNow developer who configures Client Scripts and UI Policies	Implement dynamic client-side behavior for Incident fields	Rules can become inconsistent or conflict if they are not clearly defined and tested	Different Incident states and field values require different form behaviors	Uncertain about whether the form will respond correctly to every user action
PS-3	A service desk agent / end user	Create and update Incident records using a clear and consistent form	I may not know which fields are required, editable, or relevant at a particular time	Field behavior is not dynamically controlled according to Incident conditions	Confused and frustrated
